danish.46arora@gmail.com | github.com/normieguy | Chandigarh, India

SUMMARY

Motivated Computer Science undergraduate at VIT Chennai with a strong foundation in programming, data structures, and algorithms. Passionate about building efficient and impactful software solutions, with solid problem-solving and analytical skills. Demonstrates strong teamwork and adaptability, with a keen interest in applying technical expertise to real-world challenges while continuously learning and exploring emerging technologies.

EXPERIENCE

Event Management Team Member 04/2025 – Present

CSED Club — VIT Chennai | Chennai, Tamil Nadu

As a member of the Center of Social Entrepreneurship and Development (CSED) Club at VIT Chennai, I actively participate in organising and carrying out events that encourage entrepreneurial thinking and social innovation. I oversee the coordination with team members, logistics, and ensure seamless event operations from conception to conclusion. I also assist in planning outreach initiatives, seminars, and workshops with the goal of raising awareness and bringing about significant social change. In this role, I support programs that empower communities and promote sustainable development while honing my teamwork, communication, and problem-solving abilities.

Software Engineer Intern 06/2026 – 06/2026

ADRIG AI | Chennai, Tamil Nadu

Worked with ADRIG AI on multiple projects using services React Js and Flutter for their organisation management.

Collaborated with cross-functional teams to create intuitive user interfaces, responsive web pages, and AI-enhanced features that improved user experience and workflow efficiency.

EDUCATION

Vellore Institute of Technology Undergraduate · 07/2028

Chennai, Tamil Nadu

Birla Public School 04/2022

Pilani, Rajasthan

Birla School Pilani

Pilani, Rajasthan

LANGUAGES

English, Hindi, German, Punjabi

SKILLS

Languages: C++, Java, Python, JavaScript, SQL, HTML, CSS

Core Concepts: Data Structures & Algorithms, System Design, Object-Oriented Programming, Operating Systems, Computer Networks

Technologies: React, Node.js, Flutter, REST APIs, Microservices, MongoDB

AI/ML: Scikit-learn, TensorFlow, Pandas, NumPy

PROJECTS

Nivora – Smart Homestay Booking & Travel Planning Platform

Technologies: HTML, CSS, JavaScript, MySQL/Supabase

- Developed a web-based accommodation booking platform for discovering and booking homestays, villas, and apartments across popular travel destinations.
- Implemented property search and filtering based on destination, check-in/check-out dates, guest count, and accommodation preferences.
- Designed a host and admin dashboard for property listing management, reservation tracking, availability management, and dynamic pricing.
- Integrated an AI-powered trip planning interface to generate personalized travel itineraries and destination recommendations.
- Focused on responsive UI design, transparent pricing, and a user-friendly booking experience.

Sudoku Solver

Technologies: JavaScript, Tesseract.js

- Developed an interactive Sudoku solver web application using JavaScript, featuring dynamic grid sizes, backtracking algorithm optimization, and OCR-based puzzle input using Tesseract.js to extract and map digits from images accurately.

AI Stock Prediction

Technologies: Python, Firebase

- Developed an AI-Based Stock Market Signal System which provides a real-time stock analysis system using Python and Firebase to fetch live market data, and compute technical indicators (RSI, Fibonacci levels, Bollinger Bands) and generate buy/sell signals with confidence scores.
- The system is integrated with Firestore Database for real-time data synchronization and frontend visualization.
